# SUPER HUMAN BODY

WORLD OF MEDICAL MARVELS

Narrated By  
Matthew McConaughey

*An inspiring movie  
about the wonders of  
the human body and the  
remarkable innovations  
in medical science  
and technology that  
are allowing us to live  
longer, healthier lives.*

## AN EXCITING STEM OPPORTUNITY FOR NYC STUDENTS!

**Students will enjoy a movie about  
the wonders of the human body  
and meet a scientist from the  
New York Academy of Sciences**

In this new initiative to get kids excited about careers in STEM, the New York Academy of Sciences is partnering with the filmmakers of a new educational IMAX documentary *Superhuman Body: World of Medical Marvels* to offer a series of free screening events across NYC. Students in grades 3 through 12 are invited to watch the 40-minute film and then meet with a scientist from the New York Academy of Sciences who will share his or her personal career journey and engage students in an inspiring conversation about science and STEM.

Screenings will take place at IMAX theaters and other cinemas in Manhattan, Brooklyn, the Bronx and Staten Island. Schools in Queens can see the film at the New York Hall of Science.

***Students will be amazed how  
superhuman their bodies really are!***

**For information about  
the program, visit  
[superhumanbodyfilm.com/nyc](http://superhumanbodyfilm.com/nyc)**

This program is organized by the MacGillivray Freeman Films Educational Foundation in partnership with the New York Academy of Sciences and made possible by the generous support of Kenneth C. Griffin and Griffin Catalyst.
